System: Event Management System

Event-Sathi (हरेक कार्यक्रमको साथी – Event-Sathi)

Key Features

Location-Based Event Suggestions

- The system provides map-based event suggestions.

- Events are suggested based on the user's current location.

- For example, when a user enables location access, the system displays nearby events relevant to that area.

Roles / Entities

1. User (Any User)

Features:

- **Choose Event Categories**
  Users can select preferred categories, and the system suggests events based on those categories.

- **Event Booking (Tickets)**
  Users can book event tickets using **Khalti and other digital wallets**.

- **Search Events**
  Users can search for events using:

  - Event name

  - Category (checkbox-based filtering)

  - Organizer / account name

2. Poster (Any User → After Verification)

Details & Verification:

- Any user must **create an account** before posting an event.

- A user can act as both **viewer and event poster**.

- Events posted by **new users require admin verification**.

- **Verified users** can post events anytime without further verification.

- **Event deletion** requires admin approval.

3.System Administrator

Responsibilities:

- Verify new poster accounts.

- Approve or reject events posted by new users.

- Manage event deletion and moderation.

*Premium Features (Future Enhancement)

- **Event Boosting & SMS Promotion**
  Posters can boost their events or send SMS notifications to **potential customers**.

- Promotions are targeted **based on event category and user interests**.
